Comments

- “Spraying melons for angular leaf spot disease and gummy stem blight disease. Spraying weeds and checking cows. Spraying some brush.”

-Joe Moore, Sharp
- “Soybean planting occurred early in the week before rain started on Tuesday. Herbicide and fertilizer applications were made when weather conditions allowed.”

-Randy Chlapecka, Jackson
- “Rained all last week—farmers can’t finish up first cutting. Winter annuals are over mature.”

-Bob Harper, Logan
- “Permanent flood has started on earliest rice. Corn is responding well to sidedressed nitrogen. Wheat is starting to mature. Lack of soil moisture has not been a problem. Polypipe is being rolled out.”

-Russ Parker, Crittenden
- “Most people have gotten their first cutting of hay and re-growth for the second cutting is looking really good.”

-Dana Stringfellow, Sevier
